## **Codecell Event Report**

### **Introduction to Open Source**

### **KJSCE Hacktoberfest**

**Date:** 16th October, 2018

**Time:** 5:15 pm - 7:15 pm

**Venue:** 215, 216, 217

**Total Participants:** Approx. 50 students

This event was held to promote Open Source Software development among KJSCE students and to provide a guide as to how to go about it.

Hacktoberfest is an online competition of sorts where participants have to perform at least 5 pull requests on GitHub repositories of other people that let people do so. When a participant manages to finish making 5 PRs, they are selected by the organisers to receive a congratulatory t-shirt, this is done on the basis of availability of t-shirts. Hacktoberfest was organised by Digital Ocean in collaboration with GitHub.

The students interested in learning about GitHub and Hacktoberfest showed up for the workshop. First, GitHub was introduced to them. Then they were explained as what was the purpose of GitHub. All its functionalities and abilities were discussed. They were then introduced to Git, a computer application that helps you make the best possible use of GitHub. The students taught all functions that Git performs and how to use it.

We also created our very own repository where people could make their pull request and achieve their target of 5 pull request, thus getting their T-Shirts. After Git was done, they were told about Hacktoberfest, how to enroll and what to do once you're enrolled.

The workshop ended and was a success.
